## Winterize

1. Flush system with minimum of 50 gallons of water in tank by starting engine and discharging.
2. Remove bottom (drain) plug from pump.
3. Wash trailer.
4. Cover engine or store inside.
5. A thin film of diesel fuel or WD-40 will help prevent corrosion especially on bolts.

## Operator Qualifications

Operation of this nurse trailer shall be limited to competent and experienced persons. In addition, anyone who will operate or work around this equipment must use good common sense. In order to be qualified, he or she must also know and meet all other requirements, such as:

1. Some regulations specify that no one under the age of 16 may operate power machinery. It is your responsibility to know what these regulations are in your area or situation.
2. Current OSHA regulations state in part: "At the time of initial assignment and at least annually thereafter the employer shall instruct EVERY employee in the safe operation of servicing of all equipment with which the employer is, or will be involved."
3. Unqualified persons are to STAY OUT of the work area.
4. A person who has not read and understood all operating and safety instructions is not qualified to operate the machinery.

## Sign Off Sheet

As a requirement of OSHA, it is necessary for the employer to train the employee in the safe operation and safety procedures with this nurse trailer. We include this sign off sheet for your convenience and personal record keeping.

Date	Employer	Employee's Signature
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____

## Safety Is No Accident

The following safety instructions, combined with common sense, will save your equipment from needless damage and the operator from unnecessary exposure to personal hazard. Pay special attention to the caution notes in the text. Review this manual at least once each year with new and/or experienced operators.

1. Read and understand the operator's manual before operating this nurse trailer. Failure to do so is considered a misuse of the equipment.
2. Make sure nurse trailer is secure before operating.
3. Always keep children away from equipment.
4. Make sure everyone that is not directly involved with the operation is out of the work area before beginning the operation.
5. Make sure all safety devices, shields, and guards are in place and are functional before beginning the operation.
6. Shut off power to adjust, service or clean.
7. Keep hands, feet, and clothing away from moving parts. It is a good idea to remove all jewelry before starting the operation.
8. Visually inspect the nurse trailer periodically during operation for signs of excessive vibration, loose fasteners, and unusual noises.

## Parts
